**DETAILED ACTION**

***Allowable Subject Matter***

Claims 1-9 are allowed. The following is an examiner's statement of reasons for allowance: The prior art of record does not disclose a fluidized catalytic cracking process containing a dilute phase and dense phase whereby only part of the spent catalyst from the dense phase stripping zone is introduced directly into a regeneration zone and the remaining portion of the spent catalyst from the dense phase stripping zone passes directly to the dilute phase stripping zone; whereby a stream of stripping medium is introduced into the lower portion of the dilute phase stripping zone to contact the resulting mixture of spent catalyst and regenerated catalyst therein; and whereby a stream of spent catalyst mixed with regenerated catalyst and stripping medium is passed upwardly in the dilute phase stripping zone and the spent catalyst and regenerated catalyst are separated from the resulting effluent and the separated catalyst is introduced to the dense phase stripping zone. The prior art of record also does not disclose the use of a conduit means for transferring effluent containing spent and regenerated catalyst from a dilute phase stripping zone directly to a separation means for separating catalyst from an effluent of a riser reactor.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
